

ALBERT LUCKING WEBSITE – REPORTED ERROR...

Parts of this website have distortions when viewed through some web browsers. The distortions are as follows:

TEXT OVERLAPPING ADDED (UNWANTED) COLOURS IN SOME TEXT AREAS

At the moment, 3 browsers have been identified that carry these distortions namely:

GOOGLE CHROME FIREFOX SAFARI (used with the iphone)

(No doubt there may be others...)

Attempts have been made to understand why this occurs and to stop it, but it appears that it is an inherent problem between these browsers and PUBLISHER the software program this website is generated by.

There are proposals to re-build the site with an alternative WEBSITE SOFTWARE PROGRAM to enable better quality and performance but until this takes place, if you are having any of these problems please view our site through an alternative browser. The main web browsers **GOOGLE, MSN, YAHOO** are all OK.

End...
